

George N. Akai

Cybersecurity Analyst | Software Engineer | AI Solutions Developer

Chico, CA | 530-591-5143 | georgeakaing@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven IT professional with hands-on experience in **cybersecurity operations, vulnerability management, and software engineering**. Deployed 300+ Windows 11 endpoints campus-wide and boosted vulnerability remediation efficiency by 15% through Qualys VMDR reporting. Proficient in **incident response, RBAC, SIEM, threat intelligence, and secure full-stack development** using Python, Django, React, Node.js, and AWS. Holds **CompTIA Security+ (ce)**, Google Cybersecurity Certificate, and multiple AWS security credentials. Actively building AI-assisted cybersecurity tools and pursuing a career at the intersection of **cybersecurity, cloud security, and AI-driven defense**.

CORE COMPETENCIES

Vulnerability Management (Qualys VMDR)	Incident Response & Forensics	Threat Intelligence & IOC Analysis
SIEM (Wazuh, Splunk, SOFELK)	RBAC / IAM / User Access Reviews	Network Security & Hardening
Python / Bash Scripting / Automation	AWS (EC2, Bedrock, S3, IAM)	Full-Stack Development (Django/React)
DMARC / Email Security	NIST CSF / CIS Controls / GRC	Secure AI / RAG / LLM Applications

PROFESSIONAL EXPERIENCE

Computer Deployment Technician | [IT Support Services, CSU Chico](#) | Jun 2025 – Aug 2025

- Managed and triaged 300+ deployment tickets and workflow documentation in **Team Dynamix** for campus-wide PC-as-a-Service rollout.
- Deployed, imaged, and configured **300+ Windows 11 workstations** across campus labs and offices, ensuring security baselines and endpoint compliance.
- Troubleshoot network printer and peripheral connectivity issues, reducing end-user downtime and escalations.
- Followed institutional **e-waste and asset retirement procedures**, ensuring secure data destruction and regulatory compliance for legacy hardware.

Information Security Analyst Assistant | [Information Security Office, CSU Chico](#) | Feb 2025 – Jun 2025

- Generated, analyzed, and tracked remediation from **Qualys VMDR** vulnerability reports, improving team remediation efficiency by **15%**.
- Led the **Annual User Access Review**, validating RBAC permissions and enforcing least-privilege principles across campus applications and data systems.
- Authored knowledge base articles and procedural documentation for the **Annual Sensitive Data Inventory Survey**, enabling consistent, policy-aligned data classification.
- Prepared and distributed **DMARC email conformance communications** for technical and non-technical stakeholders to improve email security posture.
- Monitored **CISA advisories, CVEs, and indicators of compromise (IOCs)** to support proactive threat detection and inform patching priorities.
- Coordinated with campus departments on **patching compliance and end-of-life (EOL) server remediation**, reducing organizational attack surface.
- Tracked security awareness training completion in **CSU Learn** and coordinated follow-up to maintain compliance.
- Supported **incident remediation discussions** and documented action plans for campus security concerns.

PROJECTS

AI-Assisted Digital Forensics Platform | [Personal Project](#) | 2026 – Present

- Building a web application that ingests PCAPs and registry hives, extracts investigation signals, and uses an **AI agent with RAG (AWS Bedrock)** to auto-generate analyst reports, accelerating forensic workflows.
- Stack: Django REST, React/Vite, JWT authentication, AWS Agents, PostgreSQL.

Humboldt Helpers – AI Campus Assistant | [AI Summer Camp, Cal Poly SLO](#) | 2025

- Built a **Streamlit-based RAG assistant on AWS Bedrock** that resolved researcher navigation inefficiencies on dense university pages, incorporating Guardrails for safe model behavior.
- Implemented semantic chunking, Titan V2 embeddings, S3 knowledge base, and prompt engineering for Claude-powered responses.

Kenrish Collection – Secure E-Commerce Platform | [Academic Project](#) | 2024 – 2025

- Rebuilt a cosmetics storefront in **Django, deployed on AWS EC2 with NGINX/Gunicorn**; conducted vulnerability assessment with Burp Suite and applied OWASP security controls.
- Earlier Node.js/Express version featured mobile-first layout and encrypted credential storage.

MCP Server Integration / Agentic Workflows | [Personal Project](#) | 2025 – 2026

- Developed Model Context Protocol (MCP) server integrations to connect applications with AI agents, enabling autonomous task completion and secure tool-use workflows.

EDUCATION

B.S. Computer Information Systems | [California State University, Chico](#) | Aug 2021 – May 2026

- Focus: Cybersecurity & Information Systems | **Dean's List – Fall 2025**
- Relevant Coursework: Digital Forensics, Network Forensics, Application Security, Database Systems, Software Engineering, Usability Engineering (UI/UX), Data Structures and Algorithms.

A.S. Computer Information Systems | [Butte Community College](#) | 2022 – 2024

- **Honor Student – Fall 2022**

CERTIFICATIONS & CREDENTIALS

- **CompTIA Security+ (ce)** – Threats, architecture, operations, incident response, GRC | 2026
- **Google Cybersecurity Certificate** – Incident response, SIEM, Python automation, NIST CSF, network security | 2023–2024
- **Qualys VMDR** – Vulnerability scanning, reporting, remediation, web application scanning | 2025
- **AWS Securing Generative AI on AWS** – Scoping matrix, data classification, input/output validation, OWASP Top 10 for LLMs | 2025
- **AWS Security Fundamentals** – IAM, CloudTrail, Secrets Manager, Security Hub, AWS Config, Inspector, Macie | 2025
- **Building Gen AI Applications using Amazon Bedrock** – RAG, Agents, Knowledge Base, S3, Vector Database, Langchain | 2025
- **National Cyber League (NCL)** – Log analysis, penetration testing, forensics, enumeration & exploitation, network traffic analysis, OSINT | Fall 2024

TECHNICAL SKILLS

Cybersecurity: Vulnerability Management, Qualys VMDR, OpenVAS, Wazuh SIEM, Splunk, SOFELK, Suricata IDS/IPS, Incident Response, Threat Intelligence, IOC Analysis, RBAC, User Access Reviews, DMARC, CISA Advisories, CVE Tracking, Kali Linux, Digital & Network Forensics, SIFT Workstation, Wireshark, Burp Suite, Log Analysis (Bash/Python)

Programming & Scripting: Python, Bash, JavaScript, C++, SQL, HTML, CSS, jQuery

Frameworks & Libraries: Django REST, React, Node.js, Express.js, FastAPI, Tailwind CSS, Streamlit, LangChain

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Cloud & DevOps: AWS EC2, AWS Bedrock, AWS S3, AWS IAM, AWS Inspector, AWS Macie, Docker, NGINX, Gunicorn

AI & Agentic: RAG, AWS Agents, MCP (Model Context Protocol), Claude Models, Amazon Titan, Vector Databases, Semantic Chunking, Guardrails, Claude Code Skills

Tools & Platforms: AWS, Team Dynamix, Qualys, Wazuh, Splunk, KAPE, Registry Explorer, Arsenal Image Mounter, WordPress, WIX, Hostinger, Render, GitHub

Frameworks/Standards: NIST CSF, CIS Controls, OWASP Top 10, ISO 27001, GRC, PCI-DSS, HIPAA, GDPR basics

COMMUNITY & ACTIVITIES

- Member, **usr0 Cybersecurity Club**, CSU Chico
